

Princess/Bride

Designed by Jo Nakashima

Date: November/2010

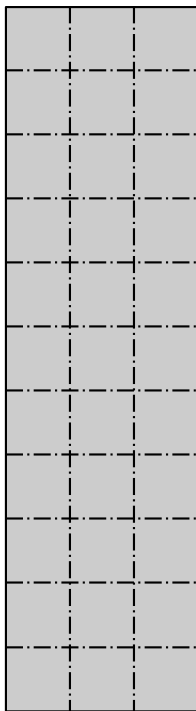

Difficulty Level: 1/5

Time to fold it: 10 min

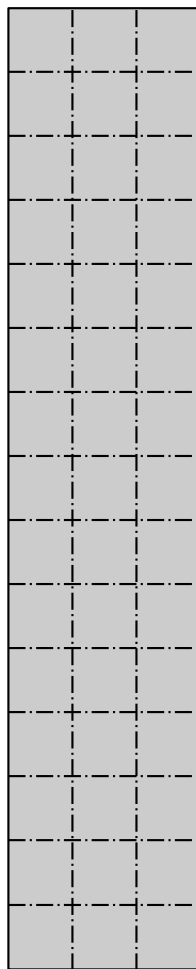

Video: <http://youtu.be/l-UJwvqh3yE>

Paper: 4.5cm x 16.5cm (Princess)
4.5cm x 22.5cm (Bride)

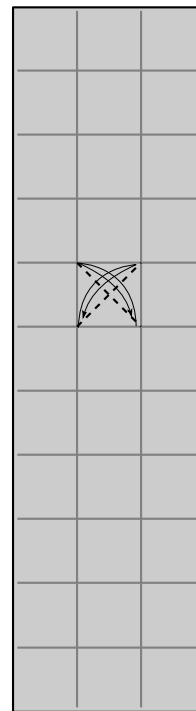

- Standard paper
- Tissue foil
- Wet folding

Princess (3x11)

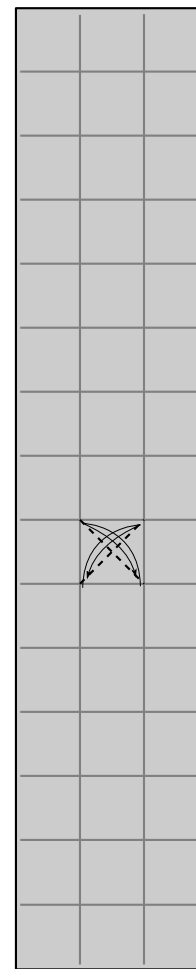

Bride (3x15)

Princess

5

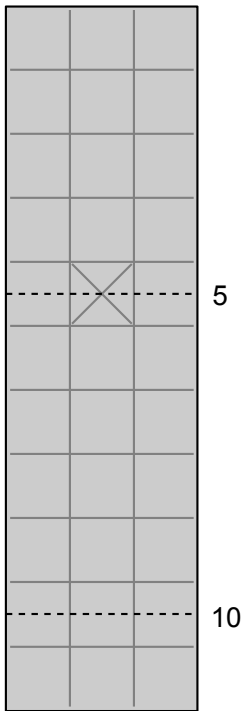

Bride

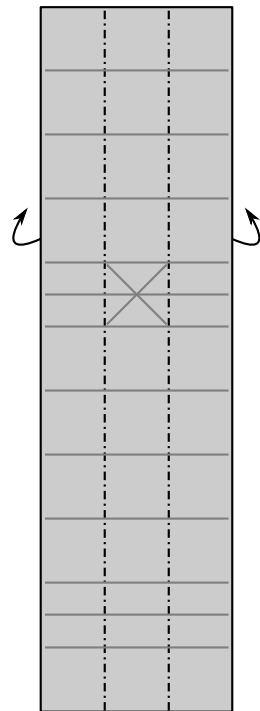

9

1. The Princess and the Bride are basically the same model, but the Bride has 4 more blocks on the top. pre-crease a grid as shown

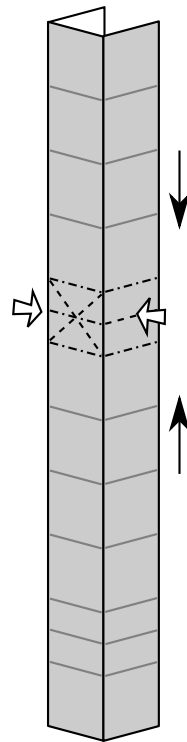

2. To make the bride, follow the same steps of the Princess but ignore the top 4 segments. Crease the diagonals of the middle square of 5th segment (9th on the Bride)
Only the princess will be shown on next steps

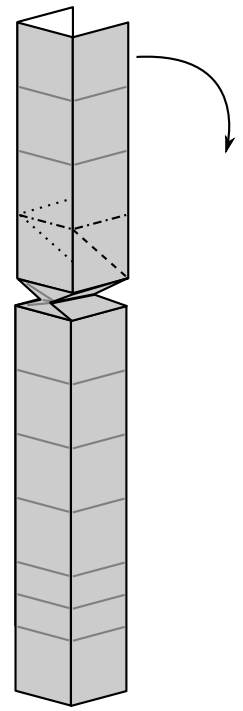

3. Fold the 5th and 10th segments in half horizontally

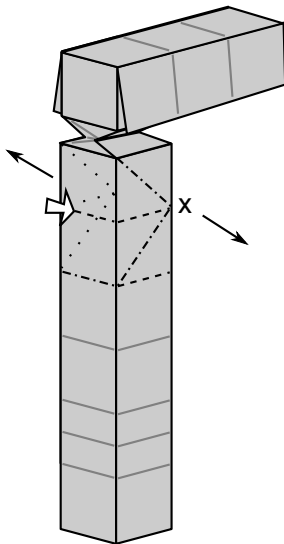

4. Mountain fold the left and right sides

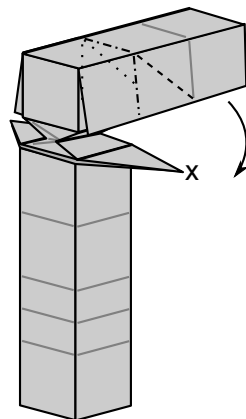

5. Collapse the 5th segment like a waterbomb base

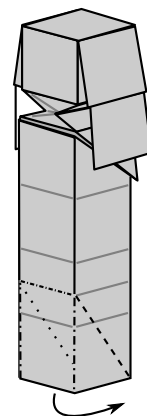

6. Bring 3 top segments to the horizontal position. To do that, fold diagonals of side squares on 4th segment

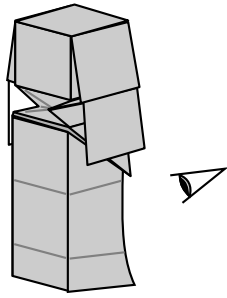

7. Fold the diagonals of side squares on 6th and 7th segments.

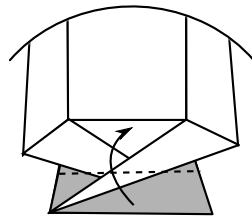

8. Bring the 2 top segments down. To do that, fold the diagonals of little squares

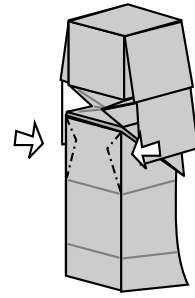

9. Fold the 1.5 blocks of the bottom behind. Fold the diagonals of the rectangles, so the base won't be a square

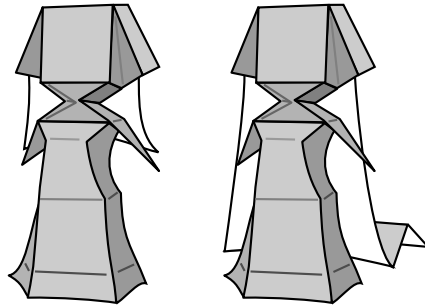

10. Pervert view

11. Valley fold the flap to lock the base

12. Shape the body using the tips of your fingers

Finished Princess/Bride
